

UEB Double Track for better purchase and sale management

Doble Vía

The Base Business Unit (UEB), a point of sale for construction materials, increases the number of people daily given the variety of products offered there.

The UEB Doble Vía Construction Materials Sales Point achieves better purchasing and sales management in the municipality of Sandino.

Achieving this involved analyzing each of the amounts of the products to be offered at this time of year.

Madislay Favelo Prieto, a salesperson of the area, in her explanation, made reference to the range of products that are currently available in the municipality, among them she mentioned the tanks of sealed paint of various colors, with differentiated prices taking into account their quality.

It also has bulk paint, construction products, and supplies ranging from hardware assortments to hydraulic and sanitary pipes.

This is a good time to purchase quality products through this establishment of the Commerce and Gastronomy Company.

That is why residents come here, attracted by the variety of offerings and the fresh air at the end of the year.
