

They analyze the delivery of products from the regulated family basket to the population and the provision of services

canasta

In a working meeting, the members of the Distribution Council in Ciego de Ávila analyzed, with those responsible for the Food Program in each territory, the availability of basic basket products and other provisions intended for social consumption and priority centers.

During the meeting, the members of the Distribution Council in Ciego de Ávila analyzed the availability of resources in the province, with the premise of guaranteeing food, meat products, dairy products and other supplies destined for the assistance units of the province, the schools and other prioritized centers, as well as social consumption.

In the work meeting, chaired by Yadier Pérez Tellez, Coordinator of Programs and Objectives of the Government in Ciego de Ávila, the planning of the distribution of food, hygiene products and other necessary goods was carried out, as well as the implementation of measures to avoid hoarding and ensure that all citizens have equitable access.

There it was specified that, to date, this central territory has the flour to continue delivering bread for sale to the population. Toiletries belonging to the two-month period are distributed throughout the warehouses.

In the case of Meat and Dairy Companies, the products demanded by priority centers are delivered, such as hospitals, maternity homes and grandparents' homes. In addition, medical diets are ensured, which also receive contributions from the Acopio Company with food and fruits.
